ABOUT ME

I have more than eight years of professional software development experience. Most of my career I have been developing web software in ASP.Net using C#. I am currently a mobile software engineer writing applications for the Android mobile operating system.

I am an open source contributor and I have written free and commercial applications including a top ten app on the Android Market. I also write a commercial development tool for Android engineers called ActiveAndroid.

EXPERIENCE

Software Engineer — Mobiata (an Expedia company) — Ann Arbor, Michigan — 2010-Present

Mobile application development on the Android platform using Java.

Software Engineer — Web Ascender — Okemos, Michigan — 2008-2010

Application development using .Net, C#, PHP, and Ruby. Managed numerous clients and projects. Developed and managed projects for the product division (DotNetNuke modules). Implemented emerging technologies and processes in the workplace. Mentored interns and new hires.

Contract Software Engineer — WhitePages Inc. — Okemos, Michigan — 2008-2009

Wrote and sold an Android mobile application to WhitePages Inc. The application — “CallerId by WhitePages” — reached over 100,000 downloads in its first week and has been in the top ten paid applications. Transitioned development to the WhitePages team.

Software Engineer — Artemis Solutions — East Lansing, Michigan — 2007

Application development using .Net, C#, PHP. Managed numerous clients and projects.

Software Engineer — MC Squared Technology — Okemos, Michigan — 2006-2007

Application development using .Net, C#, PHP. Managed numerous clients and projects. Created rich media content and graphic designs for clients and internal use.

Graphic Designer — Reyes Advertising — Lansing, Michigan — 2005-2006

Designed digital visual content for multiple medias including posters, brochures, and screen prints.

Computer Instructor — Resurrection MS — Lansing, Michigan — 2004-2006

Created and taught lessons covering touch typing, photo manipulation with Photoshop, and introduction to programming with C.

Contract Software Engineer — MetaSurge — Lansing, Michigan — 2003

Contracted to complete a client relationship management desktop application written in VB.Net.
